Goals & Objectives of Meeting

- 1) Learn an approach to remediation that will engage the struggling learner, identify and engage your faculty experts, minimize faculty burnout, and creates transparency within your program.
- 2) Identify the important aspects of the remediation process (eg. Education, Legal responsibilities, key stakeholders, communication)
- 3) Understand the ACGME Program Study and Site Visit. Learn approaches to the Program Study that may benefit your program for ongoing accreditation.
- 4) Review new residency program development and the incorporation of an interprofessional team curriculum
