

The Pediatric Neurosurgery practice at Valley Children's specializes in the diagnosis and treatment of a variety of diseases and conditions of the central nervous system for infants, children and adolescents. Our neurosurgery program offers comprehensive, most up-to-date care for the full range of neurosurgical diseases. We have clinical expertise in treating brain tumors, epilepsy, hydrocephalus, congenital malformations, cranial and spinal trauma, peripheral nerve and craniofacial disorders. We are equipped with the most advanced technologies such as the ROSA robot (robotic assistant for minimally invasive neurosurgical procedures), intraoperative neuro navigation and stereotaxy, intraoperative imaging and the Neuroblate laser – allowing us to provide the most state-of-the-art care for our children.

Diseases we treat include:

- Tethered cord syndrome
- Spina bifida (myelomeningoceles, lipomyelomeningoceles, dermal sinus tracts, split cord malformations)
- Encephaloceles
- Hydrocephalus, CSF shunt malfunctions, syringomyelia
- Chiari malformations
- Pseudotumor cerebri
- Aqueductal stenosis
- Arachnoid cysts
- Plagiocephaly
- Craniosynostosis, craniofacial anomalies, and macrocephaly
- Brain and spinal tumors
- Head and spine trauma
- Central nervous system vascular malformations
- Spasticity
- Epilepsy

Neurosurgery is also part of several multidisciplinary teams at Valley Children's that provide coordinated comprehensive care for your child. Multidisciplinary programs at Valley Children's include our neuro-oncology program, craniofacial clinic, spina bifida clinic, spasticity clinic and a level 4 epilepsy center.

Access Center 24/7 access for referring physicians 866-353-KIDS (5437)

Outpatient Referral Referral forms online at valleychildrens.org/refer FAX: 559-353-8888 Neurosurgery Office Numbers Main: 559-353-6277 FAX: 559-353-5424

Physician Liaison 559-353-7229

Pediatric Neurosurgery Referral Reference Guide

Condition	Pre-Referral Work-up	When to Refer
Brain and Spinal Cord Abscesses	 Document neurological symptoms and signs 	Positive scan
Brain and Spinal Cord Tumors	 Document neurological symptoms and signs 	Positive scan
Cerebral Palsy/Spasticity	 Document neurological symptoms and signs, treatment history, and response to prior therapies 	 Secondary referral after Neurology or Physiatry consult
Chiari Malformation	 Document neurological symptoms and signs MRI of head and cervical spine 	• Positive scan
Craniosynostosis	Clinical exam	Early referral if clinical suspicious
Cysts, Lumps and Bumps on Head	 Document history of affected area 	Routine referral upon positive physical finding or scan
Cysts of the brain	 Document neurological symptoms and signs 	Positive scan
Encephalocele	Clinical exam, head MRI	• Early referral if suspected clinically

Pediatric Neurosurgery Referral Reference Guide

Condition	Pre-Referral Work-up	When to Refer
Hydrocephalus	 Chart growth in head circumference, history of prematurity/hemorrhage, and prior therapy or surgery Ultrasound of head if fontanelle open MRI / CT of brain 	 Positive physical findings, scan or documentation Positive physical findings or scan
Lipomyelomeningocele	MRI of backClinical documentation of history and physical	 Positive physical findings or scan
Seizures/Epilepsy	Clinical history of seizures	 Secondary referral after Neurology consult
Spinal Dysraphism Neural Tube defects Dermal Sinus Tract	 Document neurological symptoms and signs, prior surgical therapy MRI of affected area 	 Positive physical findings, scan or documentation
Skull Fracture/Intracranial Bleed/Post-Traumatic Event	 Documentation of history clinical findings Head CT 	 Positive findings, on history and scan
Syringomyelia	MRI of affected area	Routine consult if asymptomatic
Tumors	 Document neurological symptoms and signs MRI of affected area with or without contrast 	Positive scan
Vascular Disorders of the Brain and Spinal Cord	 Document neurological and cardiovascular symptoms and signs 	 Positive physical findings, scan or documentation
